

How are my country of belonging's values reflected in my work, you ask?  
**I LIVE IN ITALY!** What more can I say?  
Que sera sera...

My mentors taught me determination, honesty ... and strong family values lead to a happy life! One in which I often work in PJs and in silence!

I value my peers' and profession's constant research for new materials and technologies ... when and where functionality and simplicity rule.

SHOUT OUT to contemporary architect Renzo Piano and ALL HAIL the late and most-inspiring Ludwig Mies van der Rohe.

# Reason Is Power

If I could have a fantasy dinner date with any guests of my choosing, I'd have simple pasta with Albert Einstein, Martin Luther King and Queen Elizabeth (hold on the garlic for the Queen!)

We would whip up ways to make the world a better place for all instead of a few, and daydream of mankind taking nature no longer for granted.
