Light is the fourth dimension of architecture

Wireless solutions for today's lighting designers

Choice is important! Contemporary lighting requires that wireless control, automation, and access are integrated into the project at the earliest stage. Casambi's wireless technology can be integrated into any luminaire to provide a complete and versatile lighting control system without compromising aesthetics or functionality.

Casambi's modules allow the creation of an intelligent lighting system that offers full flexibility in design and ambience in any environment, which can be reconfigured infinitely with ease. Having full control over your lighting also means having creative freedom over your interior and exterior design!

The advantages of the wireless system

Versatility

Easily configurable, Casambi's system offers independent control for each luminaire or by defined zone.

Simplicity

Casambi's technology offers a simple installation without complicated wiring to reduce deployment costs. This control system is both powerful and easy to master.

Sustainability

This technology ensures that the system is maintained in an efficient manner. Environmentally conscious, it eliminates the need for extra materials and wires.

Connectivity

System integration is easy with a customizable application program interface.

Presenting: Casambi

Casambi, was founded in 2011, with the core idea that wireless technologies can fundamentally change the way we connect daily with the objects around us. Casambi's solution is based on the low-power wireless technology already present in smartphones, tablets and even smartwatches that we use every day. This rapidly growing company is the industry leader in terms of efficient wireless lighting control solutions. Casambi is known for its excellent user experience, high performance, and scalability of solutions.

Key elements of the system

Creating inspiring environments

Plan your project with LumiGroup

LumiGroup offers creative solutions in terms of lighting fixtures and control systems, adapted to the needs of the project. Constantly seeking products and applications that will help transform an environment while meeting the specific needs of its users, LumiGroup designs, in collaboration with design industry professionals, functional, ergonomic, and creative spaces that stimulate and motivate its occupants.

The success of our lighting agency is due to the passion and expertise of our team members; a team that works to meet and exceed our clients' expectations. Contact us to schedule a meeting with one of our experts.

Integrate Casambi into your devices

Casambi technology can be integrated into all types of luminaires, drivers and even LED modules. Many manufacturers have already integrated this technology into their lighting fixtures creating a very easy way to control a multitude of fixtures on a single platform, which previously had different dimming and control modes.

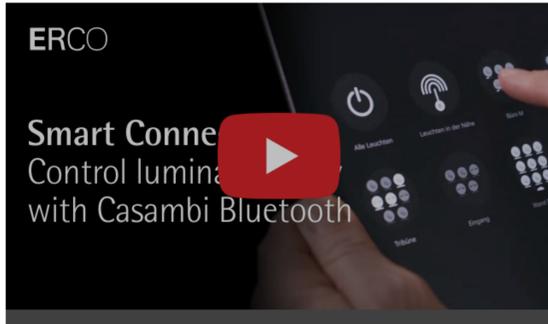

Casambi offers an optimal solution in terms of ease of installation and functionality, with minimal additional hardware and deployment costs. This technology makes it much easier to control your environments by accessing them from your smart devices, either on site or remotely. Make an appointment with one of our experts to develop your lighting system.
